

## HENRY MELCHIOR MUHLENBERG: TORY OR PATRIOT?

By LEONARD R. RIFORGIATO  
The Pennsylvania State University  
Shenango Valley

If you travel northwest of Philadelphia along route 422, in twenty five miles you will come upon the tiny village of Trappe, or Providence as once it was called. There you will find Augustus Lutheran Church, looking much as it did when erected in 1743. Pass through the single portal over the worn flagstone floor, into the dimly lit interior and time first slows then rushes backward in its course to a point two hundred years past. As your eye sweeps the simple church you note the rough-hewn ceiling beams, box-like, European style pews, a simple altar surmounted by a small gallery and then, off to the left the beautiful red walnut pulpit handcrafted in Europe and imported to lend a touch of elegance to this otherwise rustic chapel. Through the silence of the centuries you can perhaps still hear the voice of a preacher summoning his flock to worship his God. His name was Henry Melchior Muhlenberg, the Patriarch and founder of colonial American Lutheranism. He built this church. Through the window you can see his home, still standing though greatly altered. Here his wife Anna Maria Weiser gave birth to eight children. He baptised them all in the tiny church. If you listen intently through the silence you can hear the crack of guns and the marching feet of ghostly soldiers. They come from Valley Forge a few miles due south.

This article is about both the Lutheran pastor and the colonial soldiers. It is more specifically about Henry Melchior Muhlenberg's attitude towards the American Revolution. What was he—a patriot or a tory?

Two previous Muhlenberg scholars Theodore Tappert<sup>1</sup> and Paul Wallace<sup>2</sup> stand in agreement: Muhlenberg began the Revolution as a Tory in feeling, but a neutral by profession and gradually became reconciled to American independence. This article claims that Muhlenberg was, from the beginning of the Revolution, a patriot.

There is, admittedly ample reasons for confusion over Muhlenberg's loyalties because he was always careful to avoid, in so far as he could, assuming public political positions. This is not to say that he was unconcerned about or uninvolved in the great issues of his day. Rather, he preferred to work behind the scenes manipulating others to accomplish his desired goals.

Machiavellian as this sounds, Muhlenberg felt it was the proper procedure for one in his position. He was, of course of German birth, a Lutheran steeped in a tradition where church and state were separate, but the state was superior, at least in temporal matters. Throughout his ecclesiastical studies and later ministry in Germany, Muhlenberg was a protege of powerful secular patrons. When he came to Pennsylvania in 1742, he came

as a missionary subordinate to and dependent on superiors in far-off Halle. He brought with him then an attitude of respect for authority which made him forbear from public challenge. His experiences in America merely reinforced an innate political reticence.

During the early portion of his public ministry, Muhlenberg was totally preoccupied with asserting his ecclesiastical authority over dissident, quarrelsome, independent-minded Lutheran congregation. He had no time for political matters. Even had he wished to exercise secular leadership, he would have been soundly rebuffed by his congregants for, as he confided to his journal:

It is impossible for respectable preachers to engage in political activity, for the inhabitants, both great and small, are exceedingly jealous of the rights and liberties which God has granted them and which many former anointed and crowned sovereigns have confirmed with oaths; besides the people are prejudiced against and are secretly suspicious of even the best and most respectable pastors, as if the pastors wished to curb their freedom, and accordingly they chase away pastors or cut off their incomes if they have the slightest impression that these preachers intended to engage in political activity.<sup>3</sup>

Muhlenberg vividly recalled the fate of the German Reformed pastor, Michael Schlatter, in this respect. Schlatter had publicly espoused English language schools for Germans, an idea conceived by Franklin and covertly supported by Muhlenberg. When the Philadelphia publisher, Christopher Sauer turned German-Americans against the project by picturing it as a plot to anglicize them, Schlatter was forced to give up his pastorate. The lesson had not been lost on Muhlenberg.

As tensions increased between Britain and her restive colonies, Muhlenberg became more determined to avoid any opinion in public. This became increasingly difficult for, as the leader of the numerous German Lutheran minority, he was in fact, whether he willed it or no, an important political person. His silence only led both sides in the dispute to suspect him and made them more determined to smoke him out.

When, for example, he undertook a journey, at Halle's request, to visit Lutheran congregations in Georgia from September 1774 to March 1775, rumors spread about his supposed Tory inclination. First he was accused of seeking colonial-wide establishment of the Church of England which he would then join to collect a tithe. Then, somewhat contradictorily, it was said that George III had converted to Roman Catholicism and old Muhlenberg had sailed to England to celebrate a popish mass for him. At the very least, it was believed that he had been tarred and feathered, publicly displayed in a cart, and then driven out of Philadelphia in disgrace.<sup>4</sup>

Muhlenberg bridled at such malicious gossip but held his tongue. What refutations he made were done privately. On a trip he encountered a German who, aware of the talk, bluntly asked him why "the German Lutheran preachers have brought about such a grave tragedy, have betrayed the liberty of the country, and have caused this grave war?" Muhlenberg hotly denied that he was either a Tory or traitor. Indeed he appears to align himself with the patriot cause: "My dear friend," he replied "you are not correctly informed. I and most of my colleagues have friends and relatives—and children—here in America. We cherish civil and religious liberty as a precious gift vouchsafed to us by God."<sup>5</sup>

As public opinion veered towards war, many colonies began to raise armed militia. Such martial actions, were in Muhlenberg's view, legitimate measures of self defense: "It is not as if the inhabitants wished to injure anybody, or invade the rights of others, for they wish to defend their civil rights and the liberty of conscience given them by God."<sup>6</sup> Great Britain, he felt, "had rejected the Christian religion and, along with it, has lost light and right, has been struck with blindness in a just judgment, and has become ripe for humiliation."<sup>7</sup> God would use her as a scourge against American sinfulness; then, in the full measure of time, when her purpose was played out, she would be cast away. Still, up to the final break, Muhlenberg hoped that the mother country would return to her senses; that the sight of well-armed and enraged colonists might compel her to compromise as she had done in the past.<sup>8</sup>

With crisis succeeding crisis, Muhlenberg's sanguine expectations of reconciliation waned. During the early part of 1776 he seriously began to consider the possibility of removing himself from Philadelphia. The city was, after all, the very seat of rebellion for there the Continental Congress sat. To remain and yet maintain silence on the issue of revolution would be impossible. Moreover, Muhlenberg realized, as any sensible man did, that Philadelphia would soon be attacked by the British. Hence, in March 1776, he purchased a home in Providence which was both conveniently near and comfortably distant from the metropolis. Within a week of the proclamation of American independence, Muhlenberg betook himself and his family to this country retreat, "to remain there" as he explained "until a better solution offered itself."<sup>9</sup>

Safe in his rustic retreat, Muhlenberg felt himself free of political pressures. Yet he continued to maintain a keen interest in political and especially in military matters. That this interest reflected an American viewpoint is evidenced in the journals.

These journals are, however, problematic. In a sense they were an official record of his American ministry. As such they served as the basis for his annual reports to Halle, which published them in a missionary newsletter *Hallesche Nachrichten*, designed to raise funds for American Lutheran congregations. Obviously what Muhlenberg sent to Halle he heavily edited to suit his own purpose. The reverend fathers in Europe knew of Muhlenberg only what he intended they know. He also used his journals as a repository of his financial records and of synodical documents "and proceedings. To this degree, then, they were semi-public documents" not merely a private diary. Hence, Muhlenberg was both cautious and circumspect, one is tempted to say byzantine, about what he recorded. It could, after all, someday be used against him. Despite all this the journals do indicate that Muhlenberg was never neutral as he professed, but leaned decisively toward the colonial cause. This would explain his anxiety over their fate. Several times he began preparations to ship them to safety as the British neared Providence, an action scarcely necessary if they were innocent of rebel ruminations.

In the journals we find evidence that Muhlenberg thought the colonial cause just. Britain's object was "to make serfs of the inhabitants of America by force and to reap what they have neither plowed nor sown," while the Americans were trying "to defend the rights and privileges granted and stipulated to them by God the Highest and by former crowned heads."<sup>10</sup>

Muhlenberg, however, despite his protestations, did not entirely remain aloof from political matters. He did, for example, play a minor role in the

adoption of the revolutionary Pennsylvania constitution which, in British eyes at least, might appear inappropriate for one either loyal to the king or a strict neutral. On September 17, 1776, Muhlenberg travelled to Philadelphia to confer with the Rev. William Smith, Anglican rector, about the document, several portions of which troubled them. The new government demanded no specific profession of Christian faith from office holders, granted full freedom of worship and conscience to any religious sect but neglected to confirm ecclesiastical charters granted under previous governments. Smith and Muhlenberg decided to petition the government only on the last point—that their existing charters be confirmed as eventually they were. But the first two points were also adopted much to Muhlenberg's anger. In a venomous passage he recorded his displeasure:

Very well you smart chief-fabricators with your refined taste, you have acted very cleverly in allowing nothing concerning a Savior of the World . . . to slip in. For that is too old-fashioned . . . your ingenious edifice is founded on quicksand and will not survive many stormy winds and rains. Your heathen morality has putrid sources and your wild and untainted flesh abhors the salt of Christian morality.<sup>11</sup>

Muhlenberg does not appear to have had a high opinion of revolutionary Pennsylvania leadership. At one time he refers to it in Apocalyptic terms as "the beast with horns."<sup>12</sup> At other times he sees it riddled with atheists, deists and naturalists. The main object of his disaffection was possibly Benjamin Franklin, Pennsylvania's most influential politician, and a renowned deist with whom Muhlenberg had previously tangled. Franklin who disliked Germans whom he impolitely labeled as "Palatine Boors" had attempted to both anglicize them and impose civil disabilities on them. Partly in response to this Muhlenberg had helped organize German political muscle which defeated Franklin and his Quaker party in the election of 1764. The role his erstwhile adversary played in the formation of the Pennsylvania government might be another reason for Muhlenberg's non-involvement on a public level.

In private he was deeply involved in the revolutionary struggle. Throughout the war Muhlenberg received detailed accounts of battle results, troop movements, losses of men and supplies, which he carefully transcribed in his journals. He rejoiced when "our armies," as he wrote in an unguarded moment, won and bemoaned colonial setbacks. For example, upon learning of the failure of Burgoyne's campaigns against Forts Edward and Stanwix, he noted that "God in His providence has not yet been willing to hand over the poor inhabitants, especially the defenseless women and helpless children, to the rage of the barbarians."<sup>13</sup> During 1777, when the British occupied Philadelphia, the American army encamped a few miles away from his home. Muhlenberg constantly entertained colonial officers, once receiving a personal briefing on the progress of the war, in return for breakfast, from General "mad Anthony" Wayne, a man not given to overfamiliarity with Tories. American armies stored supplies in his cellars and Muhlenberg diligently observed days of fast and prayer prescribed by Congress condemning the "members of sullen sects [who] declared their consciences were oppressed if they were expected to observe a day which was appointed only by men."<sup>14</sup> He denounced conscientious objectors who refused to pay a tax to the revolutionary government in lieu of military service<sup>15</sup> and applauded the arrest of wealthy Quakers on charges of treason:

[they] have criticized and fought against the defensive measures of the Americans, both publicly and privately, in writing and orally, have refused to contribute their share even in money, have spoken for and rendered every possible assistance to the enemy, etc., they cannot be tolerated as members of a *republic* but must be excluded and be deprived of protection . . . they did not suffer for Christ's sake but on account of their transgressions as traitors. . . .<sup>16</sup>

Muhlenberg continually denounces British atrocities on civilians and prisoners of war alike. At one point he suggests that Americans could stop British barbarism by giving "the measure which is measured out to them. For the Americans have more prisoners and so far these have been held and treated humanely."<sup>17</sup>

One could also argue on the basis of guilt by association that Muhlenberg was a patriot. Certainly an astonishingly large number of his relatives actively supported the struggle for independence. One son, Peter, fought as a Brigadier-General; another, Frederick, served in both the Pennsylvania Assembly and the Continental Congress. Francis Swaine, his son-in-law and Peter Weiser, his brother-in-law, also saw military action. Yet Muhlenberg remained on intimate terms with all these rebels.

It is true that he initially opposed the careers chosen by his two sons, but only because it meant abandoning their ministerial careers and exposure to great personal risks. "There are" Muhlenberg mused when he heard of Peter's appointment to Brigadier-General "greater and better deeds than murdering men." But, he continued, "for everything there is a season . . . a time to kill and a time to heal."<sup>18</sup> The time, he realized, had come to fight. In November of 1778 Peter asked his father's advice on whether he should stay in the army or be at the side of his pregnant wife. Muhlenberg emphatically urged him to stick to his duty.

In times of war—a crafty and powerful enemy cannot be restrained by midwives; this must rather be done with God's help by men who have the vocation, skill and heart for it—the circumstances make it clear that neither resignation nor furlough could occur without great risk and harm.<sup>19</sup>

For their part, the British and their Hessian mercenaries were convinced that Muhlenberg was a rebel, a conviction which caused them assiduously to seek his capture. On several occasions, as British troops neared his home, Muhlenberg prepared to flee. His son-in-law the Rev. John Christopher Kunze, who had remained in Philadelphia to minister to the city's Lutherans, was forbidden by the British to communicate with the rebel Patriarch. As Kunze dryly noted "the [British] officers are rather unfavorably informed concerning my father-in-law."<sup>20</sup>

Shortly after this incident, Muhlenberg did produce a quasi-public refutation of the charges against him. It is this document, reproduced in his journal, which serves to buttress the position that he was either a Tory or a genuine neutral. An investigation of the letter and the circumstances in which it was written refute this.

On December 4, 1776 Muhlenberg's son Frederick, then a Lutheran clergyman, wrote to inform him that a Hessian officer in New York was allegedly circulating a letter supposedly from the Rev. Gottlieb Anastasius Freylinghausen director of the Halle Institute. Though Frederick's information was all hearsay, as he had not himself seen the letter, it was supposed to be directed to the Pennsylvania Ministerium and warned Halle pastors to have nothing to do with the rebels.

Nearly a year later, on November 5, 1777, Muhlenberg's daughter, Margareta Kunze, wrote from Philadelphia to inform him that the same letter had surfaced there, again in the hands of Hessian officers. Muhlenberg was exceedingly puzzled because he had not, nor did he ever, receive this letter. But presuming that it was genuine, which it was, and upset because the British were making use of it to argue that Muhlenberg had violated its orders, Muhlenberg decided to reply.<sup>21</sup> This he did in a long-letter to David Grim, a prominent New York Lutheran layman who had contacts with the Lutheran Court Preacher in London, Rev. Frederick Wilhelm Pasche. The letter was sent open to Kunze who in turn would relay it to Grim. It appears that Muhlenberg was, in this way, trying to kill two birds with one stone. Well aware that the British read all mail coming into Philadelphia, he hoped that its contents, once perused by a military censor, would diminish their ardent desire to imprison him. If Grim later forwarded it to Germany via London, he would also be let off the hook at Halle which was probably picking up reports through the Hessians of his political meddling.<sup>22</sup> They could, after all, cut off his supply of men and money.

On the surface, the letter appears to exclude Tory views, but a surface impression is misleading. Muhlenberg was a desperate man. As he saw the situation: "Things look black for me for I am caught between two fires and I am still unable to see the outcome which divine providence will ordain for me." As Muhlenberg realized from the arrests of his close clerical friends, Rev. Michael Schlatter and the Episcopalian minister Jacob Duche, the British felt no qualms about imprisoning men of the cloth. Muhlenberg had also heard that "their treatment of preachers is barbarous and merciless."<sup>23</sup> The letter then is best interpreted as an effort to avoid imminent arrest by emphasizing, perhaps even exaggerating his previous loyalty and surface neutrality.

The letter begins with a complaint that Hessian officers are condemning him without justice or trial as a rebel. To counter this, Muhlenberg points out his strong ties to the king George III and the House of Hanover. He emphasized that he, as a Hanoverian, was doubly a subject, by birth and naturalization, that he studied at the royal university, received his call through the London Court Preacher, Ziegenhagen, and that "up to this time I have neither broken nor transferred my oath of fealty."<sup>24</sup> This could be a Machiavellian argument, technically true but beside the point. Obviously Muhlenberg had two oaths of fealty to George III, the first as Elector of Hanover, the second as king of Great Britain. He could renounce Britain's king and still keep his other oath to the House of Hanover. It should be noted that Muhlenberg does not call George III "his Britannic Majesty," a form he uses elsewhere, but simply His Royal Majesty. It would have been extraordinary had Muhlenberg escaped Pennsylvania's mandatory oath to the State and Congress. Providence was a small village. He could never have neglected to swear allegiance without being noticed, nor would army officers have felt so free to visit him and impart military information had he not done so. In all probability then, he did renounce his oath to George as British sovereign.

Muhlenberg next tackles an embarrassing blemish on his self-proclaimed abhorrence of the public political spotlight. In 1766 he had indeed taken a public stance in delivering and later printing a tract which he states was "for the use of our German inhabitants" and in which he "emphasized loyalty and due obligation toward our rightful king, the whole royal house, and all governments."<sup>25</sup> What he neglects to mention is that his topic was

a thanksgiving for the repeal of the Stamp Act and that it received general distribution.<sup>26</sup>

Muhlenberg then relates in great detail the rumors spread by "a few God forsaken, crafty persons, who well knew that I was a loyal subject of the lawful government" to the effect that he was a Tory selling out his country to the King.<sup>27</sup> Instead, he insists, throughout his tenure in Philadelphia on the troubled year 1775 he studiously avoided involvement in the rebel cause. For emphasis' sake he recounts an incident that happened in July of 1775 when a member of the revolutionary congress attempted to get Muhlenberg to declare himself on the rebel side by writing an exhortation to colonial Germans warning them that their liberties were in grave danger from the king. According to Muhlenberg, he curtly replied:

Sir, as far as I know, all of the intelligent members of our Lutheran congregations are loyal subjects of his Royal Majesty, our sovereign, and such a statement as is desired is not befitting to preachers; political matters are usually published through the newspapers.<sup>28</sup>

Supposedly when Congress arranged to have such a declaration circulated through a German lawyer, Lewis Weiss, Muhlenberg joined with the Philadelphia German Reformed pastor, the Rev. Caspar D. Weyberg, in protesting "publicly with petitions and fair words that the document should not, and could not pass under the names of preachers nor as having our approval."<sup>29</sup> Curiously this incident is recorded only in this letter copied into his journals under date of January 22, 1778, three years after it was supposed to have occurred. Journal entries for the month of July 1775 do not mention it. Instead, under date of July 20, 1775, Muhlenberg notes that he celebrated at St. Michael's Church in Philadelphia a day of repentance and prayer proclaimed by the Continental Congress.<sup>30</sup> Obviously there is something peculiar about the whole incident.

When independence was proclaimed, Muhlenberg tells Grim: "robbed of my former protection, old and worn out, unwilling to exchange my oath of loyalty except by compulsion, another victim of the enraged people, I betook my sick wife to the country . . . here I thought I should have a solitary, quiet, private life."<sup>31</sup> That quiet life, of course, did not turn out to be so solitary, for as already noted, he had plenty of rebel visitors in the country. It is also equally as likely that Muhlenberg fled from the city to escape the British, as it is to avoid renouncing the oath to the king. That it occurred to him that this might well be the British view is attested to by his admission that "perhaps a wrong construction was put on the fact that I retired from Philadelphia to the country."<sup>32</sup> Certainly had Muhlenberg wanted to function as a preacher loyal to the king he could have trekked the few miles back to Philadelphia while it was still in British hands.

Peter Muhlenberg's military career would also, to understate the matter, have raised suspicions about his father's loyalty. This Muhlenberg explains away by the fact that "he was two hundred and fifty miles away from me and entered [the army] contrary to my will and warning."<sup>33</sup> Yet a mere ten months after he wrote this, as we have seen, he talks Peter out of resigning from the army. To buttress his point that fathers and sons are not responsible for each other and often hold different political views, Muhlenberg brings up the fact that Benjamin Franklin's son, William, Governor of New Jersey became a Tory. This is true. It is also true that Franklin then disowned him, something Muhlenberg never did.

The letter closes with Muhlenberg denying he ever received Freylinghausen's letter but assuring Grim that all Halle pastors have nonetheless always acted in full accord with its instructions—they have remained neutral.

This then is the basis for the claim that Muhlenberg was either neutral or a Tory: he stated as such to Grim. Actually he said no such thing. As has been observed, what he wrote was ambiguous, was intended to prevent his arrest and could be explained in such a way as to harmonize with the view that he was a patriot. There is, however, no evidence that Grim ever got the letter. Muhlenberg, it seems had second thoughts about the project. In admirable cloak and dagger fashion, on February 4, 1778, Muhlenberg enclosed a note to his daughter Margareta Kunze, in a letter addressed to a woman in Philadelphia. The note, written in Latin to thwart military censors who, it was hoped, had been deprived of a classical education, told her to send the letter to Grim if her husband thought it expedient. "If not, I beg and beseech you to hide the one you have, lest your poor father, wishing to avoid Charybdis, fall into Scylla."<sup>34</sup>

From the onset of the bloodshed, it appears that Muhlenberg recognized that, given the British attitude, independence was irrevocable, reconciliation impossible. Thus he notes in his journal on October 4, 1776 that Lord Howe had called on all Americans to return to their allegiance. His comment:

it is easy to proclaim: come to allegiance, swear loyalty anew, and you shall find grace and pardon. On the other side, however, it is also proclaimed: Beware of a power that breaks solemnly sworn compacts, that makes you slaves or serfs by cunning and violence, that binds you *in all cases whatsoever*, that feeds idlers and rakes with your property gained by your sweat and blood, and desires to rob you of the rights and liberties bestowed upon your children and children's children by God and former crowned heads.<sup>35</sup>

Muhlenberg continues to reason that peace could be achieved on British terms only if *all* colonists renounced independence and surrendered voluntarily, a patent impossibility. Should only a portion of the population heed Lord Howe's decrees, civil war would erupt in America between Patriots and Tories, a situation even worse than revolutionary warfare.

On June 14, 1778 Muhlenberg recorded the peace terms proposed by the ill-fated Carlisle Commission which granted the colonies *anything short of independence*. This too, he felt, would fail:

Oh a thousand pities that only a half or a third of such proposals were not made three, two, or even one year ago, or that no attention was paid in the homeland to the petitions submitted by *Congress!* Thus much bloodshed between mother, children and relatives, and the horrible destruction, etc., could have been avoided. How can *Congress* repeal *independence* now that a treaty has been concluded with France?<sup>36</sup>

Besides, Muhlenberg was convinced at a very early date, even during the setbacks of the first years of war, that, with God's help, America would win.

. . . Although the American cause has been precarious, adverse, and gloomy, as if decline and collapse were unavoidable, a mightier, invisible Hand has intervened and unexpectedly helped.<sup>37</sup>

Finally, on March 25, 1783, after seven long years of bloodshed, Muhlenberg gratefully recorded the end of the war and penned his thoughts on the new nation.

Now one can, of course, reasonably conclude from this success that it was the will of the Supreme Ruler of heaven and earth that there should be *independence*, and not otherwise. But whether this was God's active or passive will, His gracious or His permissive will, only the future will show, according as men use *independence* well or abuse it.<sup>38</sup>

<sup>1</sup> Theodore G. Tappert, "Henry Melchior Muhlenberg and the American Revolution," *Church History*, XI, December, 1941, pp. 284-301. Tappert's conclusion is as follows: "When the war began he had Tory leanings without being a Tory in the full sense of the word. As the war progressed he seems by almost imperceptible stages to have become somewhat reconciled to the cause which two of his sons embraced, but his doubts and fears and misgivings were never absent." p. 301.

<sup>2</sup> Paul A. W. Wallace, *The Muhlenbergs of Pennsylvania* (Philadelphia: University of Pennsylvania Press, 1950). Wallace also holds the idea of Muhlenberg's gradual conversion to the American cause: "By 1777, they were all, the boys and their father together, united in their American loyalty. But, whereas the boys had never been anywhere else, their father had had to think his way to that position." p. 109.
